boa car would be with the roof removed. It is but a few years since tows was a car-load; then came 15-ton cars, followed by 20 and 25 tons, and when 30 tons were reached they thought it necessary to place three trucks under it and it attracted much attention. Now 30-ton cars are the rule and it will not be surprising to soon see 40-ton cars in use. Engines have kept pace with the cars and now haul just as many cars as they need to, when to tons made a car-load.

WASHINGTON, April 16, 1895.
Two years ago, according to the report of the civil service commission, one out of every four persons in the United States was a woman. The same condition of affairs then existed in the matter of the promotion of women clerks. Times have since changed. Today reliable reports indicate that at least one of the departments women are being reduced, instead of promoted, the reason given in one case being that the officials believe that no woman should draw more than \$2,500 a year. So extraordinary has been the falling off in the matter of the appointment of women that there is now virtually no call for women to fill vacancies. The head of a department has the right to make a distinction between men and women, and a chief, who has a prejudice against women in the public service would have no difficulty in confining the appointments in his department to the male sex. This has been done in the last eighteen months. The civil service commission marks from "the Gentleman from Cuba" and "the Gentleman from Hawaii."

Before the next Circuit Court of Muhlenberg county there will be seven divorce suits. Some thing must be the matter over there in Muhlenberg—bad air, excessive taxation or something.

It was a Louisville man who got drunk, got married and then killed himself. The Henderson Journal commenting on it says, and of course it knows, that the world is better off of such people.

The State League of Republican Clubs will meet in Owensboro on the 1st day of May. Several hundred delegates are expected to attend from different parts of the State. As many members of the League and of the party as can attend this important League meeting.

Such as the Grubel-Sanford killing at Covington last week does no credit to Kentucky and to Kentucky manhood. Here is an example of where one of the men in violation of the laws of the Commonwealth, carried a pistol concealed about his person. Both men, too, were looked upon as honorable, upright citizens. This act, alone, throws a stain upon the blood-stained of his fellowman forever upon him.

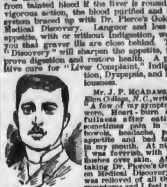

Poor old Owensboro is compelled to send her people through Henderson to Evansville.—Henderson Journal.

This is about as much a local remark as can be said, it emanating from the source it does, surprises. Whether it is the competition of any more, or as much in fact, than with other good people down this way, those of Earlinton for instance, of gassing in Henderson, in order to reach Evansville. With Owensboro as with us it is a matter of convenience, of choice, but at the same time with the fact that the people of Henderson bound for Memphis via L. & N. must necessarily pass through Earlinton. As with Owensboro far worse than that, through either Henderson or Earlinton could happen then.

ATTENTION, REPUBLICANS!
Pursuant to a call, the Hopkins County Republican Committee met in Madisonville, Ky., April 15th, 1895, and by votes thereof a mass convention of the Republicans of Hopkins County, Ky., is called to meet, at Madisonville, Ky., May 11, 1895, at 10 p. m., for the purpose of selecting delegates to the State Convention to be held at Louisville, Ky., May 29, 1895, for the transaction of such other business as may come before it. In the State Convention, Hopkins County will be entitled to seven delegates, and these delegates will be selected to that congressional district will be represented in proportion to the Republican vote at the last Presidential election, which will be as follows: Curtis, 2; Court House, 5; Hanson, 1; Earlinton, 3; Nebo, 3; and Charleston, 3.

In case any district can not be represented by a resident there who will attend the State Convention, then such district may be represented by delegates selected out of such district; the purpose being to have Hopkins County represented at the State Convention.

PIERCE'S CURE.

ARE UP AND DOING.

The Republicans of Allen County held an Extraordinary Meeting and elected Mr. O. Bradley.

E. S. BROWN IS PAID A COMPLIMENT.

The Allen County Republicans met on the 8th inst., at Scottsville, the greatest gathering of the kind ever held, and declared for W. O. Bradley for Governor and Judge E. Scott Brown, of Allen County, for Register of Land Office. The Republicans have established it as the number of women in the public service at Washington was 3,770. In 1894 the number had been reduced to 3,305, a falling off of 465. During the same period there were nine times as many appointments to men as to women, where the proportion two years ago was only three to one.

The civil service commission can do nothing for the women, unless Congress make a law requiring that a certain proportion of the appointments to men and women, "Lady clerks" did not come into the public service by grace of the civil service law. They did not hold regular appointments in the government service until the war period, when Gen. Spinner, Treasurer of the United States, tried the experiment of putting women to work.

RESOLVED, That we do hereby instruct our said delegates to cast the entire vote of Allen County in support of Hon. W. O. Bradley, of Garrard county, for Governor, and Judge E. Scott Brown, of Allen County, for Register of Land Office, recognizing in them the highest qualification and fitness for the positions mentioned. And trusting that the judgement of our said delegates they are not instructed as to the remainder of the ticket.

RESOLVED, That we now re-affirm our allegiance to the great principles of the Republican party—"A party whose achievements and triumphs have established it as the most masterful and enlightened political organization that has ever existed."

Supervisor Sullivan spent Easter in Nashville, among relatives and friends.

Several miles of new steel rail has lately been distributed by Supervisor Sullivan and men, north of Hanson.

Mr. Browder Myers, who was recently severely injured by jumping from the top of a box car, is not able yet to walk, but is some what improving.

The laying of the new steel rail is now under way. Several section crews under the supervision of Supervisor Sullivan, are doing the work.

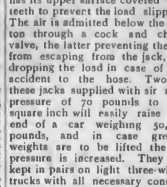

The season of the year for the running of excursion trains has arrived and one will be run over the Henderson division from Nashville to Evansville, at very cheap rates.

A special was run from Providence to Earlinton, last Sunday, to accommodate those desiring to attend Easter services. Quite a large number availed themselves of the opportunity to take a Sunday trip.

Business on this division takes shape. For a day or two a time it was very good. There followed a lull of a few days. Railroads may generally take the view that for this summer the prospects for a heavy traffic is not bright.

Many highly complimentary remarks have reached the ears of the young poet, Jessie Phillips, who last week took possession of the columns under this heading, by the production termed "Uncle Time's First Train." Even Willis, of Henderson, has been complimented with a much prized letter paying him a nice compliment indeed.

The Henderson Journal has been after the city fathers of Henderson to force the L. & N. railroad company to put a flagman at the Green street crossing in that city. One is needed there, probably to attract attention, or to foot the risk they are engaged in, into the coming year of that route. What else, pray?

Mr. W. M. Lacey.

Nervous and Weak

"I cannot find words in which to express my thankfulness for what Hood's Sarsaparilla has done for my husband. He was afflicted with rheumatism and a grip. He lost his appetite, was nervous and his actions became sluggish, having no life in his system. He needed physical work. At last he decided to take Hood's Sarsaparilla, and after taking two bottles he felt as though he was well, and he has been able to do his day's work and looks like a new man."

Our home is never without Hood's Sarsaparilla. We will not accept any other brand of medicine.

Hood's Pills cure constipation by softening the bowels and acting on the alimentary canal.

Down in the Mines.

Secretary Platt, of the Oak Hill Mines, says that some much needed improvements will soon be made at his mine. The work is now completed. He will be able to fill orders more promptly.

The using too freely of liquor got one of our colored miners into trouble, last Saturday. He attempted to make a race course of the streets, regardless of the law and the danger to travelers.

Nothing would be more welcome to the St. Bernard Coal Company, than to see inquiries start up that would create a demand for coke, as they have an immense supply on hand.

Mr. Dick Mercer, who was formerly an employee of the St. Bernard Coal Co., but who is now associated with Secretary Platt in the control of the Oak Hill mines was here last week calling on his many friends.

Some mining stock gamblers, of St. Louis, who have recently been trying to dupe innocent parties by selling them stock in some mines, that have thus far existed only on paper, have been called to a halt by the courts of St. Louis, and are under bond for their appearance on day of trial.

Mr. Tom Murphy met with a slight accident last Monday, while he was in No. 11 mine. He was when he was on the track and one of his hands was caught between coal and car, and the fleshy part of his hand cut off, and one finger badly lacerated. Dr. Jackson dressed the wound, and outside of the day having to carry his arm in a sling, he is doing well.

The first automatic coal dump ever constructed in this State has recently been put up by the St. Bernard Coal Company at their new mine at Portons Gap, under the supervision of Ben W. Robinson, M. E., and the truckmaster of Foreman Toombs and his assistants. This new dump is so constructed that a loaded car, arriving at the mine, has been jumped, sending it on its way back to the mines on tracks on the other side of the dump. The cars are so arranged that the load cars will run by themselves on the dump, and the empties will run from the dump without motive power being applied.

The following table shows the total production and consumption of coal in this State in the last few years, and compares it with the production of coal in the United States:

Year	Production, home use.	Export.	Consumption, home use.	Export.
1890	1,750,000	1,250,000	1,500,000	1,000,000
1891	1,800,000	1,300,000	1,550,000	1,050,000
1892	1,850,000	1,350,000	1,600,000	1,100,000
1893	1,900,000	1,400,000	1,650,000	1,150,000
1894	1,950,000	1,450,000	1,700,000	1,200,000
1895	2,000,000	1,500,000	1,750,000	1,250,000

This table, it will be seen, shows a total production in the ten countries mentioned of approximately 43,000,000 tons of coal. Of this quantity about 30 per cent. was produced in the United Kingdom, 31 per cent. in the United States, and the little over 15 per cent. in Germany. The United States heads the list as regards the production of coal, and in the West, the price per ton at the mine is lower here than in any other country.

The fact seems to be that whether the claim of higher wages paid here has any basis or not, the production of coal in this State is much larger as to point to the conclusion that the highest paid labor in the end is the cheapest.

Miners in all parts of the world have many superstitions. The mines of Germany are supposed to be haunted by little old men not over two feet high, dressed in black, and sometimes they are benevolent and sometimes otherwise. Goblin miners known as knockers are supposed to be evil spirits. They make strange noises, and the tapping of their picks can be heard in one body not yet reached by the mine. Each jack for ladder dwarf is a malicious hunchback of frightful appearance, who tips his feet in the faces of the miners just before an accident occurs. Vegetables growing in mines are believed to have talismanic virtues. In Saxa an ancient lead mine has been deserted and permitted to fill up with water for fear of a mine of coal and various species of spider that inhabits it.

ELECTROPOISE

THE GREATEST CURATIVE AGENT KNOWN.
OPIMUM HABIT CURED.
Six weeks' use of the Electro-poise cured a friend of the opium habit. It also benefited me a great deal. I suffered with kidney trouble.—Rev. W. Bruce, Hopkinton, Ky.

From the editorial columns of the Western Recorder.—"If there is any truth in men and women, it does indeed benefit a great number of cases of all kinds of sickness. A friend who had suffered long with nervous prostration wrote that it had cured him. A gentleman in the city, who, a year ago, seemed to have only a few days of life left him by consumption, has greatly improved, has been able to go on uninterrupted with his business. Two other personal friends said that they had never known so much for their rheumatism. Nothing has ever received so many testimonials from trustworthy persons."

"One night's use of the Electro-poise gave me relief from brain congestion and vertigo. I have been a well man ever since."—Rev. George A. Meach, Hopkinton, Ky.

THE "RENEWAL" SEASON OF THE L. A. W. HAS COME. There is, to say, there is no longer a special "season" in which to renew, but payment of dues at any time gets membership in the League for one year from date. All wheelmen at once see their local committee and renew or apply for membership. The official organ of the League now goes to each member and is better than ever. It is a combination of "L. A. W. Bulletin" and "Good Roads Magazine," and deserves the attention of every rider of the wheel with any interest in better high ways.

At first, man walked. Then he captured the wild horse and rode. Later he hitched his horse to a wheeled carriage; but now he has dispensed with the horse and spins along on wheels alone. There is only one step farther, and that is to discard the wheels and fly; but flying is still a remote possibility. Though aeroplanes are pre-eminently his home, it is found everywhere. Adventurous wheelmen are now whirling past camel caravans in Asia, giving the dust to Kurdish brigands, seeking the Mahatmas in Gobi, penetrating the deserts of Tibet and circum-fencing the world at their pleasure. It has been announced that a bicycle has been invented that will carry a rider over the waves, and few would now be surprised should an enthusiast scorch across the Arctic snow-cap in his bicycle in a collision with the pole. The bicycle has not simply come to stay, it has come to conquer. Ten years ago, it was considered a toy for children and idlers, but now its earnest devotees of both sexes are past number. And the men and women who enjoy its exhilarations are healthy, high-spirited people who give the nation strength and character. What if some enthusiasts do develop humps from over-indulgence in the sport? Let the wisest ones rub their humps for luck and keep their feet on the ground. It is much wiser to see a man on horseback as the Gauchos of the pampas are to seeing a man on foot.—Truth.

GOOD ROADS make good people, and good people are much improved by Good Roads.

Civilization is the result of having easy means of communication.

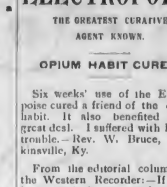

A good dinner, well digested, is worth any amount of sophistry.

Savages have no roads.

The Bicycle is a great civilization.

Bicycle Riders use the roads which the League is working to improve. Therefore, Bicycle Riders should belong to the League—"Good Roads."

Now is the time to subscribe for THE BEE.
